## Laboratory related vocabulary and expressions

The picture sheet can be used in various ways. The teacher can randomly dictate the words below, using sentences to give context and the students label the pictures with the appropriate vocabulary. Or the vocabulary can be scrambled on the board or on a sheet (see next page).

1 a bad result	a flammable substance	analyzing data
2 burners	conducting an experiment	culture flasks
3 dropping a reagent	examining plant samples	food experiment
4 incubating cultures	loops	measuring liquids
5 pouring liquids	scales	recording results
6 spilled blood	sterilizing equipment	keeping samples cool
7 streak technique	holding a thermometer	transferring samples
8 using a pipette	weighing vegetables	syringe
9 measuring temperature	chemical reactions	researching plant diseases

a bad result  
chemical reactions spilled blood  
weighing vegetables  
holding a thermometer  
recording results  
incubating cultures  
keeping samples cool  
measuring temperature loops  
examining plant samples  
scales  
burners  
syringe  
researching plant diseases  
sterilizing equipment  
dropping a reagent  
measuring liquids  
a flammable substance  
streak technique  
culture flasks  
pouring liquids  
using a pipette  
food experiment  
transferring samples

# conducting an experiment

# analyzing data
