The Story of the Lost Keys

One day a few weeks ago, Olivia went shopping in the morning, like she always does. However! on this day, she suddenly realized, her keys, were not in her bag. She must have dropped them somewhere. Oh no! She started to panic. She was really worried, about being late to work. Olivia works in housekeeping, at a hotel in the afternoon. If she is late to work, she could lose her job. So, she looked everywhere. She looked for her keys, in her bag, and walked around the supermarket, several times. After a while, she looked at her watch and panicked again. She had to get to work very soon.

Meanwhile, Justin, who was also doing some shopping, was walking in the supermarket car park. He found some keys lying on the ground. And then he recognized Olivia's car. He knew her car as he always passes her at the shopping center. So Justin walked around, and found Olivia wandering in a panic. He showed her the keys. Olivia was so relieved. Finally, she headed to work, and arrived on time. Everything was ok.
